

Processmap: External Beam, Step: Treatment planning, Checklist: TP Smart Planning Checklist

- 1 Treatment Category:
 - Plan
 - Calc/TBI
- 2 Treatment Machine
 - IX, EX, TrueBeam
- 3 Planning Technique
 - Wedges
 - DMLC
- 4 Beam Modifier
 - MLC
- 5 IGRT/Motion monitoring
- 6 Respiratory Monitoring
- 7 Patient/Plan Specific
- 8 Site:
- 9 Immobilization type
 - Body Stereo Cradle IV, Something else

Processmap: External Beam, Step: Treatment planning, Checklist: Dosimetrist

1 test

Processmap: External Beam, Step: Treatment planning, Checklist: Initial Physics Chart Check

- 1 Site and Laterality
- 2 Modality and Energy
- 3 Signed prescription
- 4 Fractional Dose
- 5 IGRT ordered
- 6 Dose verification ordered
- 7 Dose specific modality, fraction match
- 8 IED/pacemaker assessment
- 9 Isodose, DVH, Target, OAR, Margins OK
- 10 Previous RT or Multiple prescriptions
- 11 Gaps, overlaps, Het. Corrections
- 12 Plan constraints and simulation position OK
- 13 MU handcalc/IMRT QA complete
- 14 Initial mark, Shifts, Couch structure
- 15 RV beams, IDs param, Wedge, Bolus ok
- 16 RV CBCT ISO and setup shifts OK
- 17 RV calendar scheduled
- 18 Physics signed all documents
